Capabilities Statement

Company Overview

BP Logix is a leading provider of intelligent automation software that helps organizations across industries streamline their operations, reduce costs, and increase efficiency.

Founded in 1995, BP Logix has a long-standing reputation for delivering transformational process automation solutions to hundreds of organizations around the world. We make it our mission to solve our customers' biggest challenges with innovative, scalable solutions and a robust service program that takes the guesswork out of implementation and technical support.

Our Process Director for Government platform helps government agencies optimize operations, reduce costs, and maintain regulatory compliance.

- NAICS Code: 511210 Software Publishers

Certifications
- SOC 2 Type 2
- SOC 3
- USAF EPL

TX-RAMP CERTIFIED

Why BP Logix?

Low-code process modeling
Build out custom workflows and forms quickly and easily — even for the most complex processes. Using Process Director for Federal does not require extensive coding knowledge.

Vetted reputation
With an established position on the USAF Approved Vendor List, BP Logix is a trusted vendor for Federal contractors and agencies seeking to streamline the software purchasing process.

Unmatched configurability
As a low-code platform, Process Director for Federal can handle exceptionally complex needs, providing unparalleled flexibility and configurability compared to other solutions in the market.

Outstanding customer service
BP Logix fosters customer-centric partnerships that deliver responsive product and customer success resources that enable smooth go-live timelines and long-term success.

Cost-efficiency
With a lower price point than other solutions on the market, Process Director for Federal provides exceptional value to Federal contractors and agencies seeking to reduce costs without compromising on functionality.

On-premise or cloud deployment
Process Director is available for both on-premise and cloud deployment, providing flexibility to Federal agencies. Our on-premise option offers load balancing and DMZ deployments, and because we use MS Azure, our cloud option helps agencies meet strict compliance requirements.
