

Medical affairs is evolving.

Can your publications process keep up?

Outdated publication management systems can result in delayed approvals, compliance headaches, and missed opportunities that jeopardize market success.

Automate publication management with PubPro

Speed up your time-to-market

PubPro increases the agility and speed of critical publication workflows so you can get to market faster without compromising the integrity or safety of your products.

Configured to your unique SOPs

We configure PubPro to your unique SOPs, which prevents your users from adopting clunky workarounds or switching between multiple applications.

Reduce errors and compliance risks

PubPro ensures your publication management processes are air-tight and constantly adapting to ever-changing regulatory and business requirements.

Feature comparison

Other publication management solutions

Review assignments	Must manually update assignments per publication	Automated, role-based review assignments
Debarment checks	Manually performed by other departments	Configurable routing of debarment check results
Dashboards	Complicated; users must configure themselves	Pre-filtered dashboards, based on user roles at setup
Configurability	Challenging and/or expensive to customize	Designed specifically to be configurable

Unmatched configurability

Get the speed and affordability you need, plus powerful configurability not found in competing solutions.

80%
pre-built

20%
configurable

PubPro offers the perfect balance of pre-built functionality and flexibility, with 80% of the solution already built and the remaining 20% configured to your requirements.

Our platform

PubPro is built on a powerful, low-code platform:

Process Director for Life Sciences

Process Director for Life Sciences helps organizations automate critical processes so they can:

- **Get life-changing products to market faster.**
- **Build great experiences for HCPs and patients.**
- **Grow and scale without sacrificing efficiency.**

With Process Director, there's endless possibilities for optimizing other processes, whether you create your own or use one of our pre-built use cases, like PubPro.

With cost-effective platform licensing, you enjoy the greatest bang for your buck as you create more new processes.

Who are we?

We are **BP LOGIX**.

We help life science organizations operate better so they can unlock their highest growth potential.

Customer success story

LimFlow, an early-stage life science company specializing in treating critical limb-threatening ischemia (CLTI), uses PubPro from BP Logix to automate their publication management process.

With collaborative document authoring tools, they reduce manual effort and save time on the publication review process.
